EDUCATION

Texas A&M University – College Station, TX

B.S. in Computer Science, Minor in Mathematics

August 2024 – May 2028

GPA: 4.0

- **Craig and Galen Brown Engineering Honors**
- **Relevant Coursework:** Data Structures & Algorithms, Computer Organization, Discrete Structures for Computing, Linear Algebra

EXPERIENCE

Business Analyst Associate

EPAM Systems

June 2026 – August 2026

Houston, TX

- Independently designed and developed an internal **LLM routing system** that dynamically selected among candidate and reference models while retaining **98.98% of reference-model quality**.
- Built and delivered the routing system as an **OpenAI-compatible FastAPI service**, integrating a Streamlit interface, **Docker** deployment, **SQLite** telemetry, and automated testing infrastructure.
- Trained and integrated **DeBERTa-based route prediction** and **proxy-reward models** with semantic caching and prompt classification to optimize response quality, inference cost, and latency.

iCode – Lead Instructor

iCode School Franchise

October 2023 – January 2024

Cypress, TX

- Led daily sessions for **60+ students and parents**, teaching programming fundamentals in **Python, HTML, and Lua** and helping students develop practical programming skills.
- Assisted in developing and teaching game-development curriculum using **Blender and C#**.

PROJECTS & ACTIVITIES

S.H.A.D.E Project

Texas A&M University

August 2025 – December 2025

College Station, TX

- Implemented **TensorFlow/Keras LSTM pipelines** for next-day heat-index forecasting and heat-risk classification, transforming **25 years** of Austin environmental data into **14-day sequential windows** with 16 weather and time-based features.
- Designed stacked **LSTM, Dropout, and Dense** architectures with Adam optimization, EarlyStopping, and ReduceLROnPlateau, achieving $R^2 = 0.80$ / **RMSE = 7.81** for temperature forecasting and **90.6% test accuracy** for heat-risk classification.

Aggie Competitive Programming Club

Texas A&M University

August 2024 – Present

College Station, TX

- Won **1st place** in assigned category at the Spring 2025 Competitive Programming Contest as part of a team-based programming competition.
- Solve algorithmic problems in weekly practices using **data structures, graph algorithms, dynamic programming, and debugging** under time constraints.

UIL Computer Science Team

Cypress Woods High School

August 2021 – May 2024

Cypress, TX

- Competed in **50+ competitive programming competitions**, including **2x HPE CodeWars**, applying algorithms, debugging, and team-based problem solving under time constraints.
- Served as **Vice President** for a club of approximately **100 members** and mentored underclassmen in Java, object-oriented programming, dynamic programming, and algorithmic problem solving.

TECHNICAL SKILLS

Languages: C++, Java, Python, JavaScript, C#, HTML/CSS

Frameworks/Libraries: FastAPI, React, TensorFlow, Keras, scikit-learn, pandas, NumPy, Matplotlib

Tools/Technologies: Git, Linux, Docker, SQLite, Streamlit, Jupyter Notebooks
